

Is your property an easy target for thieves?

Having your property stolen is expensive, inconvenient and frustrating. That's why it's essential to take appropriate measures to protect your valuable assets.

DataDotDNA® is a popular choice for those who wish to protect their property. Technologically advanced, easy to apply and cost effective, DataDotDNA® is the number one option for your theft prevention needs.

What is DataDotDNA®?

DataDotDNA® is a security identification system that uses DataDots to protect your property from theft.

What are DataDots?

DataDots are tiny microscopic discs that contain unique information that's linked to your property and you. As small as a grain of sand, DataDots are recognised as being one of the most effective ways of preventing property theft, and play a crucial role in the recovery and return of stolen property.

How does DataDotDNA® work?

- Thousands of DataDots are sprayed or brushed onto various locations on your property.
- The unique code on each DataDot is then stored on a secure database, which can be accessed by police if your property is stolen.
- The DataDots are almost invisible to the naked eye, but can be detected by a UV light and magnifying device.
- It's virtually impossible to locate and remove all the DataDots, making it extremely difficult for thieves to sell your property without fear of being caught.
- Warning stickers act as a further deterrent to thieves.

What are the benefits of DataDotDNA®?

- ✓ **Easy application** – DataDots can be applied quickly and easily to your property.
- ✓ **Cost effective**
- ✓ **Peace of mind** – If your property is stolen, its ownership is easily traceable via the secure DataDotDNA® database.
- ✓ **Proof of ownership** – The unique code on each DataDot links your property back to you, making it virtually impossible for thieves to sell it safely.
- ✓ **Insurance savings** – Enjoy a range of potential insurance discounts and incentives.
- ✓ **Awareness** – Crime Stoppers USA and the police have acknowledged the effectiveness of DataDot technology in theft prevention.
