Anderson Software is back... with P3 Global Intelligence

- A fresh new approach to cloud-based tip acquisition and management.
- Easily manage tips received by phone, web, mobile app and real-time chat.
- Fully manage your tips via pc or tablet - and even perform most administrative functions on your smartphone.
- Seamless and immediate exchange and sharing of tips without the traditional push/pull E-transfer routines.
- Automatic checking for existence of similar names, aliases, addresses and other key information across all tips in the system - globally.
- New enhanced communications capabilities between the programs and call centers and program-to-program at the record level.
- Multi-Language capable for global use
- Anticipated release: Q1 2015
- Integration with social media data mining tools to extract related suspect and associate information as a supplement to the original tip.
- Modules to manage your Wanted, Missing Persons, Featured Crimes, News and Events for web and mobile display.
- A privately branded mobile app featuring the above items along with tip submission and full 2-way dialogue.
- API web-services built in for securely sharing high profile terrorist and human trafficking information with the FBI's e-Guardian system and Interpol.
- Seamless integration with the Raids Online crime map for tip submissions on specific mapped crimes.
- Facial recognition of submitted suspects - checked against all Wanted Images in the system - globally.
