**U\*S\*A**

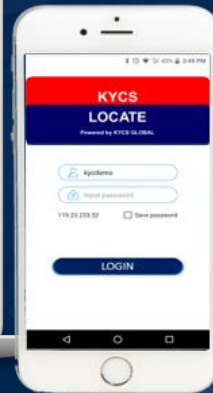

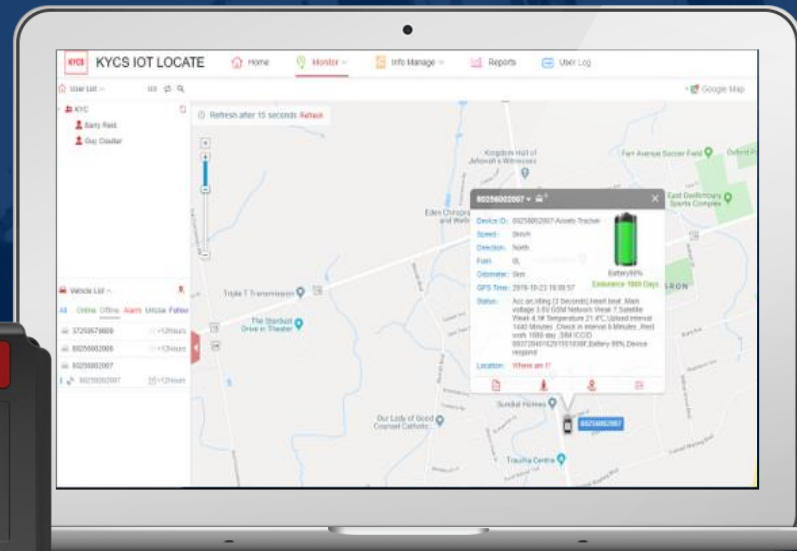

**CRIME**   
**STOPPERS**

By selling Locate, your dealers join the Crime Stoppers Keep Your Community Safe Family and have the privilege of marketing themselves as such

# KYCS Locate

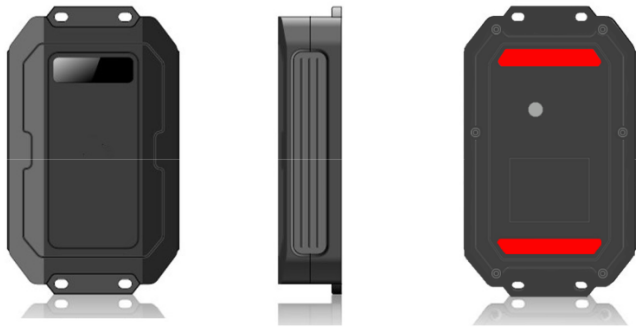

## Asset Location Solution

### Providing Dealership protection for:

Test Drives, Lot Protection, Theft Recovery and Inventory Management - The Only Solution Backed By Crime Stoppers!

1 2 3  
**Easy Install**

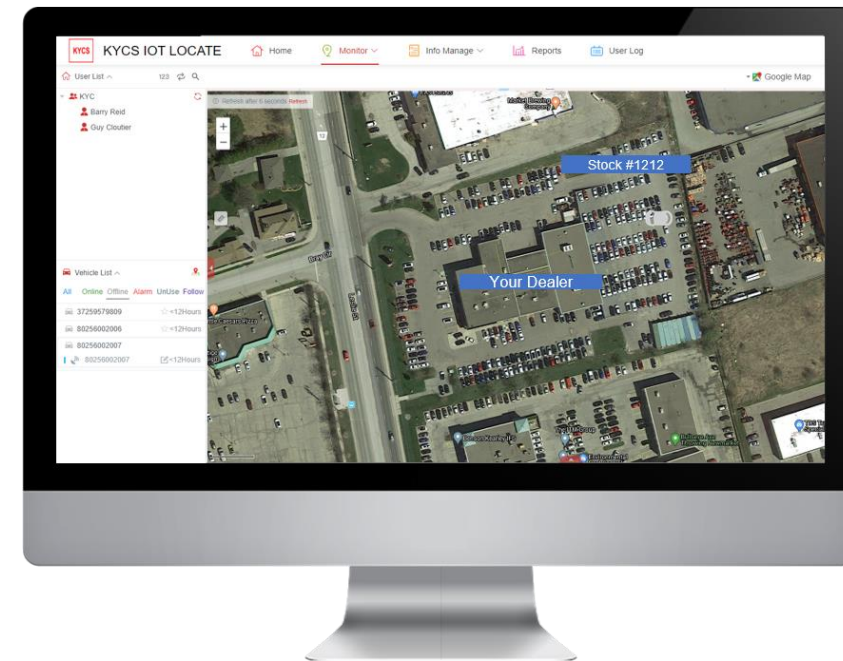

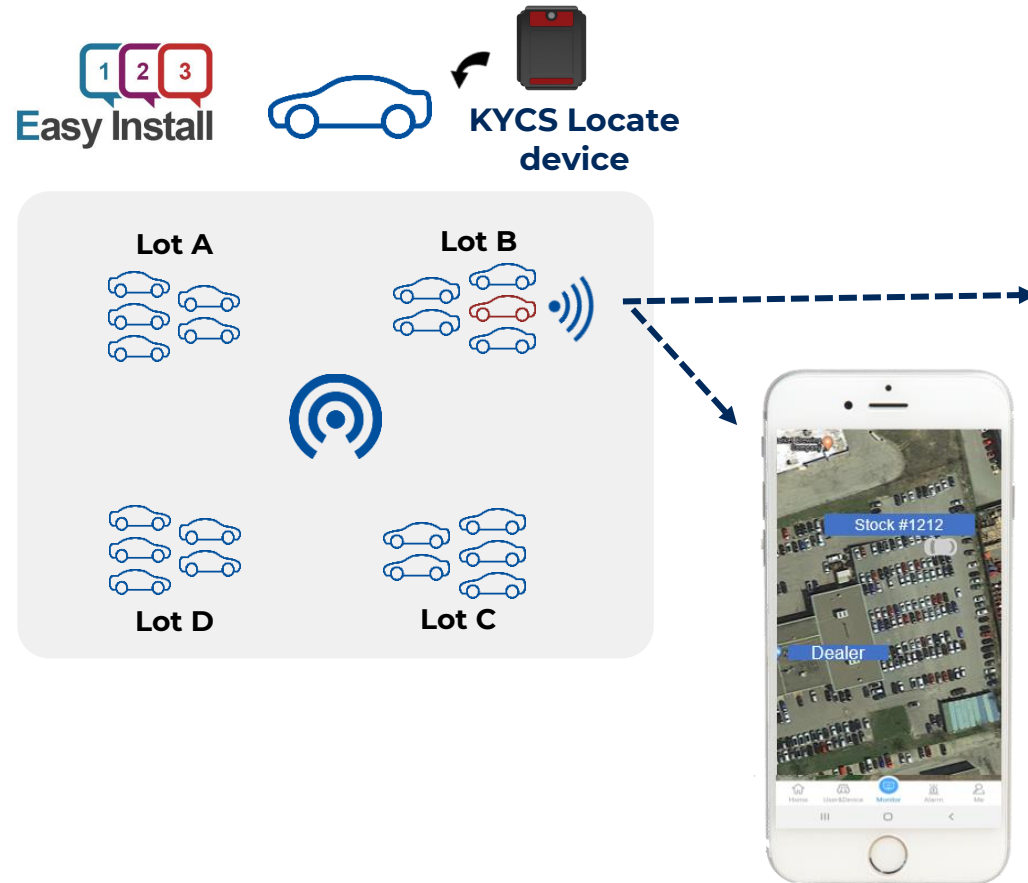

**122 x 82 x 30 mm**

# KYCS Locate Recovery Device

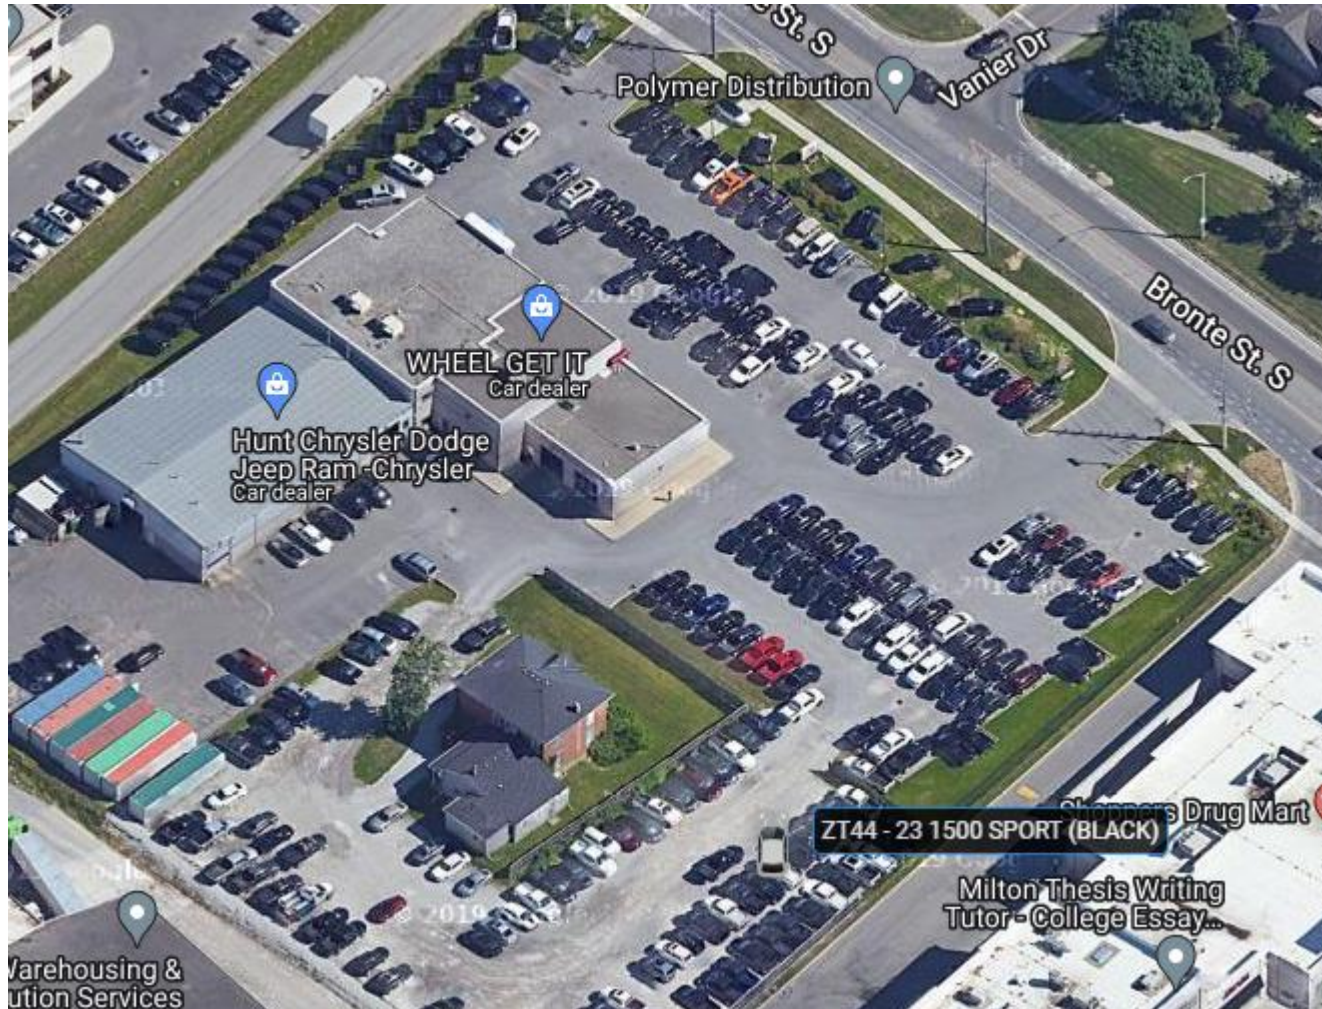

- **No Monthly Fees – includes 5 years of service to end customer**
- **Virtually undetectable by thieves/frequency scanners. KYCS Locate device shuts down and does not transmit any signals until ready to send the next update at pre-determined interval time**
- **Motion detection setting for dealerships**
- **Proprietary firmware and components allow for extended battery life and reduced data transmission**
- **Up to 7-year battery life– online battery-level monitor**
- **Simple installation, no wiring (self-powered), high powered magnets or 3M adhesive**
- **Does not affect manufacturer's warranty (no OBD plugin or hard wiring)**
- **Weatherproof industrial housing**
- **Tamper-proof alert + removal alarm**
- **Companion online portal and KYCS Locate mobile App for Dealership**

# Inventory Management & Lot Protection

Dealers view inventory location on the Locate IC web platform and mobile app.

# Lot Protection – Geo Fence

If a vehicle is stolen from a Dealership's lot, KYCS will send a notification to the dealer. Then, through its platform, KYCS will commence the recovery process.

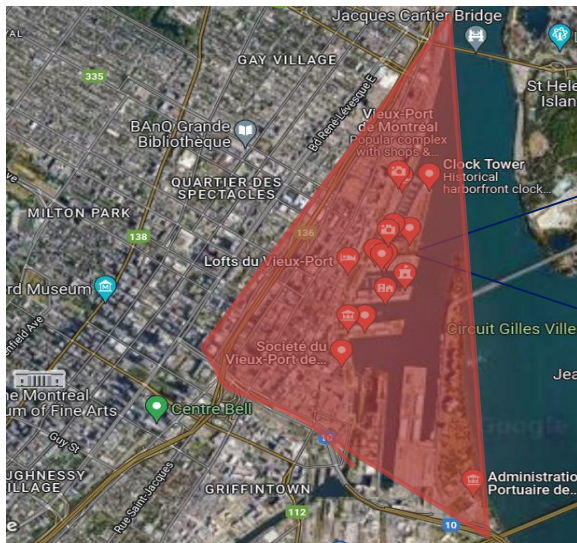

**\$299/month Off-Hours monitoring fee per dealership**

- **Dealership registers the device through F&I**
- **KYCS removes the device from Dealership's inventory**
- **Theft Recovery device and peace of mind**
- **Theft - Call police then call KYCS**
- **New device? Go back to dealership**

# Device Features – Virtual Fencing

- **Exclusively with KYCS Locate devices through KYCS Global Inc.**
- All 180 seaports in North America are equipped with Virtual fences
- If a vehicle crosses the virtual fence at one of the seaports, the Locate device will send a notification to the Recovery team upon its next scheduled check in

# Device Features – Range Finder

- Locate is the only device on the market today that continues to function from inside a shipping container.
- Locate's Range Finder feature is available to authorities only, which helps pinpoint the precise container of the stolen vehicle. This allows authorities to obtain warrants to recover the stolen vehicle.

# Device Features – Recovery Mode

If a consumer's vehicle is stolen

- KYCS Locate is switched into Recovery Mode during its next scheduled Health Check
- The Recovery team will send a Recovery Mode command to the unit so that when the Locate wakes up at its scheduled check in time they will now take control and be able to communicate with the LOCATE in real-time

Recovery Mode tracks the location of the stolen vehicle as frequently as necessary to provide Law Enforcement with the evidence they need to secure warrants

# How Factory Installed GPS Tracking Devices Are Disabled

- Great solution for telematics, fleet management, data collection – **not designed for recovery**
- **OEM tracking systems repeatedly emit signals** making them highly susceptible to prompt detection and removal by thieves

## Radio Frequency (RF) Scanner

Used to locate tracking devices installed in vehicles

- YouTube tutorials
- RF scanners on Amazon \$65.00 CAD

## Theft Recovery

Demo vehicles and customer vehicles stolen at alarming rate

- **Vehicles not recovered**
