How it works

- ✓ Local Crime Stoppers can utilize Rellevate's innovative disbursement technology
- ✓ Staff load funds onto generic branded Mastercard debit cards
- ✓ Cards are "assigned," and the card information is shared directly with the tipster
- ✓ No personal information is required from the tipster

6

Tipster Redeeming Process

- ✓ Citizen submits a tip to Crime Stoppers and receives a unique code associated with that tip
- ✓ If law enforcement acts on the tip, the information is passed back to Crime Stoppers to determine if there is a reward and amount.
- ✓ After submitting a successful tip, the tipster will use the unique code to check via the online portal.
- ✓ The Crime Stoppers admin will assign a card in the admin tool and share card information with the tipster via a secure message through the portal

7

Anonymous Payments

- ✓ Rellevate, and Crime Stoppers are not able to identify tipsters who receive virtual cards
- ✓ This process enhances what is currently in place
 - Tipsters must walk into a Bank to receive their payment
- ✓ When the card information is passed along to the tipster, the card is already activated and ready to use.
- ✓ The only data that Mastercard or Rellevate receives is when a transaction was completed, the merchant, and the amount.
 - We cannot see what was purchased, who purchased it, or if it was an online purchase, where it was delivered
